

GET THE MOST OUT OF YOUR NETWORK WITH LEADING-EDGE TECHNOLOGIES

Amartus innovates the connectivity industry with customers and partners who deliver a diverse range of solutions and technologies

Thanks to our diversified portfolio, we provide you with up-to-the-minute skills and cutting-edge technologies, and satisfy your most advanced requirements.

Service Providers

Embrace software-defined networking, virtualization, and cloud to rebuild your market position, innovate business systems, and create new service offerings.

Using a combination of network expertise and high-quality software development skills, we will help you tap into new revenue streams and get to the market first with unique connectivity services.

Network Software Vendors

Benefit from the automation efficiencies and drive innovation in your software by leveraging virtualization and abstraction of the physical layer.

Use our extensive network standardization experience and open source contribution to drive innovation into your solutions, create robust, dynamic software, and generate greater revenue.

Network Equipment Manufacturers

Find your unique value proposition by building an agile service layer above the current equipment and virtualizing service functions.

You have a pressing business need for implementing change to expand your offering and stay relevant; we've got the knowledge, skills, and experience to take you there.

Whatever your network needs, we provide the skills, the tools, and the team to support you on the path to digital transformation

Are you struggling with interoperability?

Would you like to embrace network virtualization but lack the resources?

With more than 15 years of experience in development and integration of network transformation solutions, Amartus brings essential competencies to help software vendors, service providers, and network manufacturers design, develop and integrate software that is interoperable, reliable, and future-proof.

ALIGN NETWORK STRATEGY WITH YOUR BUSINESS GOALS & DRIVERS

UNLOCK FUTURE GROWTH AND DEVELOPMENT OF YOUR SOLUTIONS

ADVANCE OPEN STANDARDS TO GAIN NETWORK FLEXIBILITY AND SPEED

BOOST YOUR TEAM WITH EXPERT, TARGET-SPECIFIC SKILLS

Frameworks/ Libraries

- Spring
- Hibernate
- Akka
- Hazelcast
- Guice

Databases

- My SQL
- PostgreSQL
- Oracle
- No SQL DBs

Modelling

- YANG
- YAML
- XML (xslt, xsd)
- UML
- HOCON

Telco Protocols/ APIs

- MEF LSO
- RESTCONF/ NETCONF
- SNMP
- TL1
- SOAP
- HTTP (REST)
- Web sockets

Network Orchestration/ Cloud

- NFV
- SDN
- OpenDaylight
- OpenStack
- Kubernetes
- TOSCA
- T-API
